LinguaFlow Teacher

Planning with instructional purpose

FOR TEACHERS

November 2026

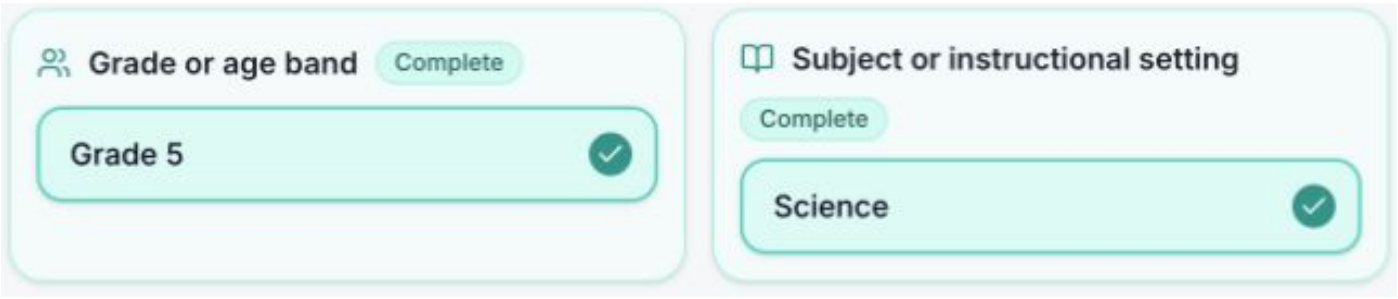

FOR CLASSROOM TEACHERS, EAL SPECIALISTS, AND COACHES

From a language goal to a teachable text.

Create mentor texts around your curriculum topic, language purpose, and teaching focus. LinguaFlow uses AI to turn your planning choices into a draft you can review and adapt.

1. Start with your classroom

Set grade, subject, topic, and audience. Two of the context fields are shown below.

HOW YOUR PLANNING BECOMES A TEACHING RESOURCE

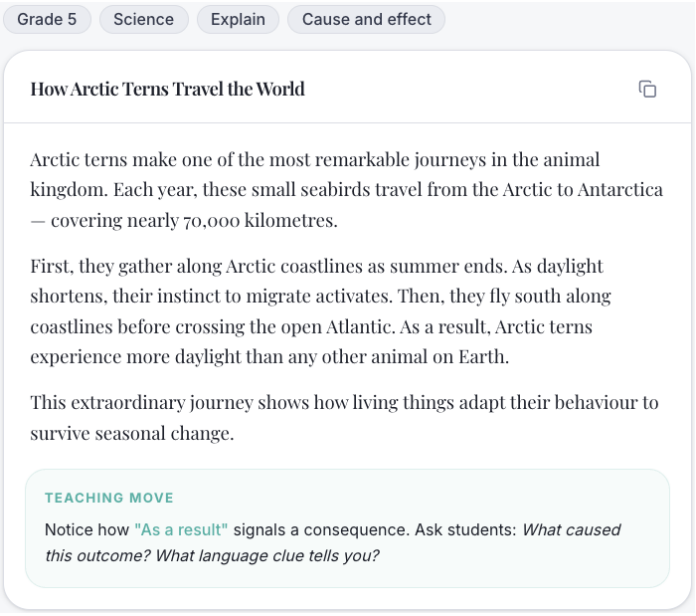

Context	Language purpose	Language features	Mentor text	Teaching move
Grade 5 science	Explain	Cause and effect	Worked example	Notice + discuss

2. Make language visible for teaching

Get a mentor-text draft, language examples, noticing questions, and practice prompts. Use the analysis to plan what students will notice and discuss.

TEACHER JUDGMENT COMES FIRST

Review and adapt every AI draft. The approach is informed by genre-based pedagogy and the Teaching and Learning Cycle.
